

ADHESIVES

We have the stained glass supplies you're looking for. Some of our stained glass supplies include etching cream, patinas, cleaning supplies, router coolant and project display holders.

No Days HoneyDoo Glue 8 oz. Power Bond

HoneyDoo Glue PowerBond is the best high strength polyurethane bonding product on the market today. HoneyDoo is a moisture cure adhesive designed for DIY Projects. Bonds to Wood, Metal, Stone, Glass, Fiberglass, Plastics, Concrete and Much Much More!

Stock Number: NDHD8
Each: \$12.35

Kemxert Ultraviolet Glass Adhesive 4 oz.

This glue is fantastic! It forms an extremely strong and clear bond and is specially formulated for glass. Technically speaking, it's an ultraviolet curing adhesive for bonding glass to glass. But around the shop we call just call it UV Glue. It will cure in natural sunlight on a sunny day or quicker with a UV lamp. It dries optically clear without yellowing and with minimal odor. In fact, we like to use it on all sorts of projects to build glass sculpture, make jewelry and any time we need to attach glass to glass. Try it, we think you'll be surprised at how well it works. If you use this glue and don't want to wait for extended curing times outside (depending on cloud cover) you may want to consider purchasing one of our UV lamps where the curing process is 2-3 minutes. (Stock# 20PIUVL) Instructions are included and are easy to follow. Store in a cool dark place at 70-75F. Shelf life is approximately 10 months. Coverage: 2740 square inches.

Stock Number: 25UVGA4
Each: \$67.95

Ultraviolet Lamp Replacement Bulb

Hey, what's this bulb for?! Use this replacement bulb in the UV lamp (Stock# 20PIUVL) to cure UV glue. This clear, non yellowing glue is used for gluing glass to glass and glass to metal. We confidently use the UV glue to create super strong bonds in glass sculpture.

Stock Number: 20HHUVLB
Each: \$23.95

Stick-2-It Spary Adhesive 12 oz Can

An excellent alternative to the high priced aerosol adhesives. Dries quickly, resists moisture and works well on a variety of surfaces. Bonds almost any material or fabric securely. Can be used as a temporary or permanent bond.

Stock Number: 25ST2IT
Each: \$9.25

Glue Stic

This is a great glue for sticking

Kemxert Ultraviolet Glass Adhesive 1 oz.

This glue is fantastic! It forms an extremely strong and clear bond and is specially formulated for glass. Technically speaking, it's an ultraviolet curing adhesive for bonding glass to glass to glass. But around the shop we call just call it UV Glue. It will cure in natural sunlight on a sunny day or quicker with a UV lamp. It dries optically clear without yellowing and with minimal odor. In fact, we like to use it on all sorts of projects to build glass sculpture, make jewelry and any time we need to attach glass to glass. Try it, we think you'll be surprised at how well it works. If you use this glue and don't want to wait for extended curing times outside (depending on cloud cover) you may want to consider purchasing one of our UV lamps where the curing process is 2-3 minutes. (Stock# 20PIUVL) Instructions are included and are easy to follow. Store in a cool dark place at 70-75F. Shelf life is approximately 10 months. Coverage: 685 square inches.

Stock Number: 25UVGA1
Each: \$22.95

Ultraviolet Lamp

A portable 5" long 4 watt UV bulb in a metal housing with a plug. Best on larger projects where you won't want to be replacing costly batteries of other UV lamps. It will cure UV glue in about 2-3 minutes.

Stock Number: 20PIUVL
Each: \$165.00

Glass Adhesive E6000 3.7 oz Tube

All purpose industrial adhesive for bonding glass to glass, glass to metal, etc. Remains flexible. Tack dry in 5 to 10 minutes. Dries clear in 24 hours.

Stock Number: 25E6000
Each: \$7.95

Double Faced Tape

Double faced. Crepe paper coated on both sides with adhesive. Bonds well to glass, metal and wood. Holds pattern pieces down. 1/2" X 36 yard roll.

Stock Number: 25DFMT
Each: \$6.65

2 SUPPLIES

patterns to glass. It will wash off with water. It's acid-free, for use on paper, cardboard, photos and fabric. It dries clear and is wrinkle-free with super bonding. AP Certified nontoxic by ACMI.

Stock Number: 25GS
Each: \$0.95

BRACE BAR

Brace bar is designed to reinforce the structure of stained glass panels making them more durable. For example, imagine all the flexing a leaded panel sustains in a door that opens and closes throughout the day. For entryway doors, transoms, or any panel in need of reinforcement, this is a solution.

Â

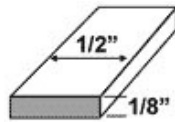

The door you see to the right has two brace bars. We have highlighted them in green to give you an idea of its practical use. Without those highlights the brace bar elegantly follows the contours of the panel and visually disappears into the design.

Â

The regular shipping charges do not apply. Brace Bar is available in both cut and uncut 6 foot strips. Cut size is two 3 foot strips. 6 foot strips must to be shipped flat in an oversized box, subject to a minimum 30 pound shipping weight. Mixed case orders and cut strips are subject to a \$7.00 packing fee.

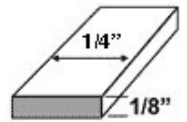

Brace Bar Steel 1/2" X 6'

CHEMICAL SUPPLIES

Cutting Oil 4 oz

Special blend of oil for proper lubrication of all oil fed glass cutters including Toyo.

Stock Number: 25BCO
Each: \$5.15

**Novacan Cutting Oil**

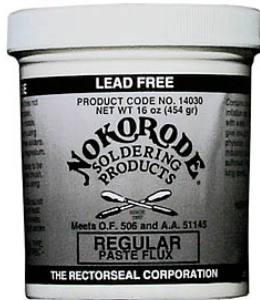

8 oz. High quality glass cutting lubricant especially formulated to give a clean cut and prolong the life of your cutter head.

Stock Number: 25NCO
Each: \$5.95

**Nokorode Paste Flux 1.7 oz.**

A non-liquid paste flux, works well on just about everything, brace bar, zinc, etc. Handy hint: To make clean up easier, trim the bristles of your flux brush to 3/8 of an" in length. This also extends the life of your flux brush.

Stock Number: 251046
Each: \$2.95

**Nokorode Paste Flux 1 lb.**

A non-liquid paste flux, works well on just about everything, brace bar, zinc, etc. Handy hint: To make clean up easier, trim the bristles of your flux brush to 3/8 of an" in length. This also extends the life of your flux brush.

Stock Number: 251045
Each: \$13.55

**Canfield Soldermate Flux 8 oz.**

The basic all purpose water-soluble liquid flux for stained glass crafts. A necessity for cleaning oxidation off copper seams and lead joints.*Cannot ship by air. Supplies Chemicals -->

Stock Number: 2510431
Each: \$8.55

**Fry Classic 100 Gel Flux 4 oz**

A thickened liquid designed for rapid wetting and shiny solder seams when hand-soldering copper foil or copper sheet metal. Oderless, non smoking and cleans easily with water! Strong enough to solder lead and zinc. Bottle has no-leak flip top lid.

Stock Number: 2510431F
Each: \$7.00

**Glastar Glasflux 4 oz.**

All-purpose flux. Rinses off with water and is free of unpleasant fumes. Creates a uniform solder bead that stays put and does not corrode copper foil or discolor lead. Available in 4 oz. *Cannot ship by air.

Stock Number: 2510431G
Each: \$6.65

**Canfield Blue Flux 8 oz.**

All purpose SUPER SAFE flux with low fumes. Ideal flux, especially for those who are allergic to other fluxes. Less active than SolderMate Eleven.

Stock Number: 2510431CB
Each: \$7.95

**CJ'S Flux and Patina Remover 8 oz.**

A safe environmentally friendly non-toxic cleaner that removes the greasy mess and residues from all types of flux. Prevents the unsightly oxidation on lead and solder from improper cleaning. Allows copper patina to work properly to give a bright shiny finish. Non-abrasive, non-flammable and water soluble.

Stock Number: 25FPR
Each: \$7.50

**Kwik-Clean Glass Cleaner 1 Gallon**

No need to mix or dilute. After you have completed soldering one or both sides of your project, spray on Kwik-Clean. Typically, with a paper towel clean project thoroughly. You may use the same paper towel or a clean one to apply the patina. Mixing the Kwik-Clean with the Patina gives added cleaning of the flux and a finer tone on the patina. After Patina is applied, clean again with Kwik-Clean. Polish as you normally would. Handy hint: For problem climates where White Mold is rampant. Steel wool after the first Kwik-Clean and before the Patina assures a finer clean of flux from under the foil. Then apply your patina and clean again with Kwik-Clean.

Stock Number: 25KC1
Each: \$55.25

Kwik-Clean Glass Cleaner 16 oz Spray Bottle

No need to mix or dilute. After you have completed soldering one or both sides of your project, spray on Kwik-Clean. Typically, with a paper towel clean project thoroughly. You may use the same paper towel or a clean one to apply the patina. Mixing the Kwik-Clean with the Patina gives added cleaning of the flux and a finer tone on the patina. After Patina is applied, clean

again with Kwik-Clean. Polish as you normally would. Handy hint: For problem climates where White Mold is rampant. Steel wool after the first Kwik-Clean and before the Patina assures a finer clean of flux from under the foil. Then apply your patina and clean again with Kwik-Clean.

Microfiber Towel 16" X 16"

Tired of using paper towels, rags or your good kitchen towels to clean your stained glass projects? Then here is the answer to your cleaning needs: The high performance Microfiber Towel that attracts and holds dirt, grime, and mildew like a powerful magnet, retaining up to seven times its weight. We have switched to using it in our production department and they love it. The office girls even want one for themselves! The secret of the Microfiber Towel is a state-of-the-art matrix of polyester and polyamide weaved in such a way as to create a magnetic "clinginess" that picks up dirt like no other product available. It is a superior, chemical free, hypoallergenic textile that can be used dry for dusting and polishing, or slightly dampened with water for cleaning most any washable surface, without the aid of chemical cleansers or solvents. It is durable enough to handle the majority of your cleaning needs and at the same time is gentle enough to carefully clean scratch-sensitive surfaces. This means an environmentally safe way to clean almost anything! Pressure is not needed to clean, just let the product's own cleaning action do it's job. The product is not pre-treated with any chemicals. To clean the towel you may machine wash and dry. Do not use chlorine bleach, fabric softener or dryer sheets.

COPPER FOIL

With a huge selection of copper foil sizes and colors to choose from, we have the copper foil you're looking for. Select from any of the copper foil supplies below.

Why different Colored Backings?

Improves the aesthetics of copper foil on clear, non opalescent glass and mirrors.

Use Copper Foil when you intend to apply Copper Patina.

Use Silver Back Foil when no patina will be applied.

Use Black Back Foil when you intend to apply Black Patina.

2-Side Silver Foil is used for ornaments that require little or no soldering.

Copper Foil 3/16" 1.5 Mil
Stock Number: 25316 Each: \$5.61

Copper Foil 3/16" Silver Back 1.5 Mil
Stock Number: 253161 Each: \$7.41

Copper Foil 3/16" Black Back 1.25 Mil
Stock Number: 253162 Each: \$7.41

Copper Foil 3/16" 2-Side Silver 1.5 Mil
Stock Number: 253163 Each: \$17.60

Copper Foil 7/32" 1.5 Mil
Stock Number: 25732 Each: \$6.00

Copper Foil 7/32" Silver Back 1.5 Mil
Stock Number: 257321 Each: \$8.76

Copper Foil 7/32" Black Back 1.25 Mil
Stock Number: 257322 Each: \$8.76

Copper Foil 7/32" 2-Side Silver 1.5 Mil
Stock Number: 257323 Each: \$20.47

Copper Foil 1/4" 1.5 Mil
Stock Number: 2514 Each: \$7.21

Copper Foil 1/4" Silver Back 1.5 Mil
Stock Number: 25141 Each: \$9.67

Copper Foil 1/4" Black Back 1.25 Mil
Stock Number: 25142 Each: \$9.67

Copper Foil 1/4" 2-Side Silver 1.5 Mil

Stock Number: 2512132 Each: \$16.58

Copper Foil Sheet 12" x 12" 1.25 Mil.

Stock Number: 251212 Each: \$4.91

COPPER FOIL REINFORCING

When copper foil panels get larger or are used in high stress areas like doors, you will need to reinforce your panels. These products add stiffness to long, unsupported spans and fragile constructions subject to shock, vibration, gravity or wind. You can strengthen your panels with our copper foil reinforcing supplies! They are used as an invisible structural reinforcement, inserted into lead came, or may be soldered between foiled panels. Take a look and let us know if we can answer any of your questions.

Cascade Reinforcing Strip 25'

Thin, hard copper to go between foil pieces that easily bends to sharp angles. Strip is .010" thick X 5/32" wide and 25 feet long.

Stock Number: 251047
Each: \$5.13

Cascade Reinforcing Strip 100'

Thin, hard copper to go between foil pieces that easily bends to sharp angles. Strip is .010" thick X 5/32" wide and 100 feet long.

Stock Number: 2510473
Each: \$19.56

Morton Strong Line 25'

Coppered steel strip .020 thick X 5/32" wide. Works well with foil or lead. Could eliminate need for external rebar. Thicker than other foil brace.

Stock Number: 25800
Each: \$7.95

ETCHING SUPPLIES

Looking for that special accent for your glass project? Use etching cream and other etching supplies with etching stencils from our Etching Stencils category to create wonderful patterns and pictures. Choose from our large selection of etching supplies below. Please Note: Etching Cream cannot be shipped by air.

Armour Etch Etching Cream 3 oz

Armour Etch is a fast acting specially formulated glass etching compound that lets you create permanent etched designs on windows, mirrors and household glassware. Create your own custom glass etching stencil or use one of our pre-cut stencils. This unique glass etching system enables anyone to personalize and decorate glass or mirrors in minutes with no previous experience. Try it, you'll love it! Not intended for use by children. Will not etch plastics or some Pyrex. *Cannot ship by air.

Stock Number: 2510332
Each: \$8.95

Armour Etch Etching Cream 10 oz

Armour Etch is a fast acting specially formulated glass etching compound that lets you create permanent etched designs on windows, mirrors and household glassware. Create your own custom glass etching stencil or use one of our pre-cut stencils. This unique glass etching system enables anyone to personalize and decorate glass or mirrors in minutes with no previous experience. Try it, you'll love it! Not intended for use by children. Will not etch plastics or some Pyrex. *Cannot ship by air.

Stock Number: 25AE12
Each: \$19.95

B and B Etching Cream 4 oz

A professional grade etch cream. This is about the best etch we have ever seen. Does not use the dreaded hydrofluoric acid as its active ingredient. Not cheap - but it is reusable. Instructions on container. *Cannot ship by air.

Stock Number: 2510321
Each: \$22.95

B and B Etching Cream 16 oz

A professional grade etch cream. This is about the best etching cream we have ever seen. Does not use the dreaded hydrofluoric acid as its active ingredient. Not cheap - but it is reusable. Instructions on container. *Cannot ship by air.

Stock Number: 25BB16
Each: \$51.95

B and B Resist Gel 4 oz

This is slick! A water based resist gel you can brush on the glass or squeeze directly out of the bottle. Forms a stencil that EtchAll cream cannot penetrate, allowing you the freedom to create without cutting a pattern.

Stock Number: 25RGGG
Each: \$13.95

B and B Designer Tip Kit

Kit with 6 different designer tips that let you design or draw with the ETCHALL cream. Personalize your projects, sign your name, or create delicate shapes. Includes 3 metal tips and 3 plastic tips, 2 bottles and full instructions.

Stock Number: 20DTBB
Each: \$20.95

B and B Squeegee

A "T" shaped plastic tool, used to apply resist or stencils to glass or mirror.

Stock Number: 20SBB
Each: \$3.95

FLUX

Flux Brush

For applying fluxes, acids, etching cream, cleaning, etc. Handy hint: Trim the bristles of your flux brush to 3/8" in length. Your brush will last longer and clean up is easier. If you use paste flux trim to 1/4".

Stock Number: 2002
Each: \$0.35

Canfield Soldermate Flux 8 oz.

The basic all purpose water-soluble liquid flux for stained glass crafts. A necessity for cleaning oxidation off copper seams and lead joints.*Cannot ship by air. Supplies Chemicals -->

Stock Number: 2510431
Each: \$8.55

**Fry Classic 100 Gel Flux 4 oz**

A thickened liquid designed for rapid wetting and shiny solder seams when hand-soldering copper foil or copper sheet metal. Oderless, non smoking and cleans easily with water! Strong enough to solder lead and zinc. Bottle has no-leak flip top lid.

Stock Number: 2510431F
Each: \$7.00

**Nokorode Paste Flux 1 lb.**

A non-liquid paste flux, works well on just about everything, brace bar, zinc, etc. Handy hint: To make clean up easier, trim the bristles of your flux brush to 3/8 of an" in length. This also extends the life of your flux brush.

Stock Number: 251045
Each: \$13.55

**Flux Bottle Holder**

No more flux spilling and cleaning up. Wide bottom holds flux bottle firmly to prevent tipping over.

Stock Number: 203011
Each: \$10.95

**Canfield Blue Flux 8 oz.**

All purpose SUPER SAFE flux with low fumes. Ideal flux, especially for those who are allergic to other fluxes. Less active than SolderMate Eleven.

Stock Number: 2510431CB
Each: \$7.95

**Nokorode Paste Flux 1.7 oz.**

A non-liquid paste flux, works well on just about everything, brace bar, zinc, etc. Handy hint: To make clean up easier, trim the bristles of your flux brush to 3/8 of an" in length. This also extends the life of your flux brush.

Stock Number: 251046
Each: \$2.95

**CJ'S Flux and Patina Remover 8 oz.**

A safe environmentally friendly non-toxic cleaner that removes the greasy mess and residues from all types of flux. Prevents the unsightly oxidation on lead and solder from improper cleaning. Allows copper patina to work properly to give a bright shiny finish. Non-abrasive, non-flammable and water soluble.

Stock Number: 25FPR
Each: \$7.50

GLAZING SUPPLIES

Every stained glass panel needs to be glazed- the final and most important step in completing a lead panel. Glazing protects stained glass for years to come by strengthening and waterproofing indoor and outdoor stained glass panels. Correctly glazed panels have the added benefit of uniformly colored leading and displaying your glass art in its best light.

Glazing is the process of working cement or putty between the glass and the lead came, a necessary step even if the panel is for indoor use. Many a lead panel has failed over time simply due to improper application. Our how-to will walk you through how to glaze your panel, protecting it for years to come. Please read the manufacturers instructions carefully.

AmChem Whiting Powder 1-1/2 Pound Tub

For cleaning leaded stained glass panels.

Stock Number: 25WPS
Each: \$5.50

AmChem Whiting Powder 3 Pound Tub

For cleaning leaded stained glass panels.

Stock Number: 25WPL
Each: \$8.95

Whiting 50 LB Bag

Used to clean up and absorb glazing compound from panels. Please Note: Regular shipping costs do not apply. Please call for details.

Stock Number: 251107
Each: \$39.95

Inland Cement Black 1 lb. Tub

Inland Cement is by far the best cement on the market today. It has tremendous strength when dry and gives your panel the finish it deserves. It is blended with a unique formula, very economical, (virtually eliminates waste) and easy to use. Instructions included.

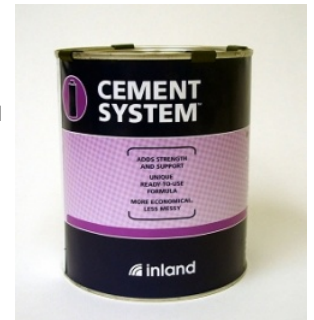

Stock Number: 251058
Each: \$8.50

Inland Cement Black 4 lb. Bucket

Inland Cement is by far the best cement on the market today. It has tremendous strength when dry and gives your panel the finish it deserves. It is blended with a unique formula, very economical, (virtually eliminates waste) and easy to use. Instructions included.

Stock Number: 251060
Each: \$21.95

Inland Cement Black 15 lb.

Inland Cement is by far the best cement on the market today. It has tremendous strength when dry and gives your panel the finish it deserves. It is blended with a unique formula, very economical, (virtually eliminates waste) and easy to use. Instructions included. Please Note: Actual shipping charges on this product may be somewhat higher than what is displayed.

Stock Number: 251059
Each: \$62.95

HANGERS

Suction Cups 1-3/4"

Includes a metal wrap around hook.
Will not yellow and has easy release tab.

Stock Number: 251096
Each: \$0.35

**Suction Cups 1-3/4" Box of 100**

Includes a metal wrap around hook.
Will not yellow and has easy release tab.

Stock Number: 251096B
Each: \$22.50

**Large Rings, 7/16" Package of 20**

Silver color and easy to solder.

Stock Number: 251009P
Each: \$1.50

**Small Rings, 3/8" Package of 20**

Silver color and easy to solder.

Stock Number: 251007P
Each: \$1.35

**Handy Hanger (package of 5 pair)**

Handy Hanger inserts are to be installed inside all zinc, brass or copper U Channel frames. Thus becoming an integral part of the finished project. The tab is inserted into the opening, leaving only the eye exposed. The Handy Hanger and the opening are fluxed, heat is applied with the tip of the iron causing solder to flow the length of the hanger.

Stock Number: 25HH
Each: \$6.50

PAPER AND PENS

Lumocolor Pen Medium Tip

This fiber-tip pen by Staedtler writes on all smooth surfaces like glass, overhead film and CD's. The pen has neutral smelling ink that is waterproof, smudge-proof and fast drying. Say goodbye to dried-up pens! Thanks to the DRY SAFE ink, pens can be left uncapped for days at a time without drying up. When left open during breaks in writing, they remain ready for action without delay. It's even lightfast, with writing clearly legible years later! Running low on ink? These pens are refillable! Also, when subjected to extremely heavy writing pressure, the tip remains locked in place and cannot be pushed back into the barrel. Lumocolor permanent ink takes only 3-6 seconds to dry, making it ideal for left-handed users. It is the best pen around that replaces the beloved "Stabilo".

Stock Number: 25LUMOM
Each: \$2.15

Lumocolor Pen Fine Tip

This fiber-tip pen by Staedtler writes on all smooth surfaces like glass, overhead film and CD's. The pen has neutral smelling ink that is waterproof, smudge-proof and fast drying. Say goodbye to dried-up pens! Thanks to the DRY SAFE ink, pens can be left uncapped for days at a time without drying up. When left open during breaks in writing, they remain ready for action without delay. It's even lightfast, with writing clearly legible years later! Running low on ink? These pens are refillable! Non-abrasive, non-flammable and water soluble.

Stock Number: 25FPR
Each: \$7.50

SANDBLASTING RESIST

Sandblasting resist helps control your sandblasting to create shapes, letters, and images in glass. Apply the resist to your glass, sketch out your drawing onto the stencil, cut the stencil with a razor blade or stencil knife, and you are ready to start sandblasting! Simply peel away the resist as you sandblast to create more complex shading and shapes or leave the resist in place to create an elegant frosted look.

Buttercut Resist - 45 Mil, 12" Per Linear Foot

Buttercut is the resist of choice for sandblasting. It is a highly durable green rubber sandblasting stencil that has superior adhesion to glass when compared to other resists and has a number of benefits. Only Buttercut resist stands up to the stresses of deep glass carving. With Buttercut it's also easier to see the layout with more color contrast and depth while being easy to quickly remove once the project is complete. Here are some tips straight from our sandblasting pros that will help you get your project done right. First of all, make sure your glass surface is clean, dry and dust free. Buttercut's superior adhesion helps prevent resist failure and pattern blowout. Also, you can reduce pattern distortion by allowing the stencil to relax. After unrolling the resist and removing the liner, but before applying it to the glass, allow the stencil to relax for a few minutes.

Stock Number: 2510881
Each: \$5.10

Buttercut Resist - 45 Mil, 18" Per Linear Foot

Buttercut is the resist of choice for sandblasting. It is a highly durable green rubber sandblasting stencil that has superior adhesion to glass when compared to other resists and has a number of benefits. Only Buttercut resist stands up to the stresses of deep glass carving. SOLDER

We proudly offer Amerway and Canfield Solder. All are manufactured from pure base materials.

Amerway 50/50 Solder

Stock Number: 255050AW
Each: \$16.80

Canfield DGS Lead Free Solder

Finally a lead-free solder that works and gives the finished appearance of 60 / 40! DGS has a lower melting range, excellent flow characteristics, runs an excellent bead and is environmentally safe and easy to use.

Stock Number: 25DGS
Each: \$39.95

Canfield Ultimate Solder

A premium solder designed with the artist in mind. Made of a special process, Ultimate combines tin, lead, and two other metals to produce the perfect solder. It goes from solid to liquid and back to solid instantly with no pasty range, creating a solid, even seam. NO MORE WAVY HEAT LINES in your seams. Melting temperature: 360° F. For best results use a rheostat to control soldering iron.

Stock Number: 25ULT
Each: \$23.95

Amerway 60/40 Solder

Stock Number: 256040AW
Each: \$19.50

Canfield Quick Set Solder

Sets up quickly and beads instantly. This solder was developed for the stained glass production solderer as well as the artisan. QUIK-SET! makes a perfect bead with one pass of the iron, and the bead sets up instantly with a silvery shine. It surpasses Canfield's 50/50 in its ability to make an excellent bead. Melting temperature: 361°-392° F.
