

Printers That Work For Transferring Images to Glass

- ❖ Use ONLY Black and White Laser printers. *If the machine can print in color-- the process won't work.*
- ❖ There is a significant risk of ruining your printer by feeding this paper through an incorrect machine.
- ❖ 600X600 dpi is the minimum resolution for good photograph reproduction 1200x1200dpi is better.
- ❖ Hp LaserJet printers (not multifunction) require a computer hook up, graphics software and a scanner to copy and manipulate non-digital snapshots.
- ❖ HP Multifunction (MPF) devices can perform as standalone flatbed photocopiers as well as a computer connected scanner and printer

Model #	Type	Max Dpi (dots per inch)	Mac Compatible	Print Quality			Price
